- Managing multi-disciplinary product files that include mechanics, electronics and software.
- Develop and work with testers.

## eRange Company Profile

The eRange platform moves to disrupt the recreational and professional firearm training industries. We are transforming the century-old system of marking paper targets by delivering a real-time digitized display of each shot as well as customized training analytics through an app directly to your mobile device. Our proprietary pocket-size hardware also allows shooters to share scores, rankings and create virtual competitions (among other things). Our sensor enables unique data aggregation previously unobtainable. On the consumer side, we provide a global live-fire gaming/training platform. For the LE/Military market, our platform provides unparalleled savings by cutting training time by 50% and providing full control of the training status of all personnel in real-time from any device.

## Why Us?

This is a unique opportunity to join a highly motivated and experienced team where you can help set trajectory, make a difference and lead on changes and new ideas. We are a small and decisive start-up with a creative and experienced team whose goal is to disrupt the market by using state of the art technology and Israeli courage, dissatisfaction and continually aspiration for excellence and of course having fun in the process.
